SUMMARY

Tech Lead with **7+ years of experience** in architecting and delivering **scalable enterprise applications**. Proficient in **SharePoint**, **Power Platform**, **ASP.NET Core**, and **React** with strong **full-stack development** expertise. Experienced in building **AI-driven and agentic applications**, solving complex problems, and leading cross-functional teams. Adaptable learner with a **zeal to grow**, embrace **new technologies**, and deliver **innovative solutions** aligned with business goals.

TECHNICAL SKILLS

- **Microsoft 365 & SharePoint** - SharePoint Framework (SPFx), CSOM, JSOM, Microsoft Graph, PowerShell.
- **Power Platform** - Power Apps (Canvas & Model-driven), Power Pages, Power Automate (Cloud & Desktop), Power BI (Online/Report Server), MS Office Scripts, Dataverse, Power Apps Component Framework (PCF), Power Platform Dataflows.
- **Frontend** - ReactJS, Redux Toolkit, HTML, CSS, JavaScript, TypeScript, jQuery, Tailwind CSS.
- **Backend** - ASP.NET Core, C#, Entity Framework Core, SQL Server, Node.js, REST API Development.
- **AI & Automation** - Semantic Kernel Agent Framework, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG).
- **Cloud & DevOps** - Azure Functions, Azure Blob Storage, Azure Data Factory, Azure SQL, Azure App Service, Azure AD/B2C, Docker, Azure API Management.
- **Data & Analytics** – Power BI (DAX, Data Modeling, Reports/Dashboards), Azure SQL.

KEY ACHIEVEMENTS

- Delivered **10+ enterprise projects** across SharePoint, Power Platform, and Azure, consistently meeting timelines.
- Enhanced API and application performance by **30-40%**, improving resource utilization and system responsiveness.
- Developed reusable **SPFx** and **Power Platform components**, achievening **20%** reduction in development time.
- Accelerated application delivery by **30%** through effective team leadership, mentoring, and code quality practices.
- Automated **50%** of manual processes with Power Automate Cloud/Desktop and Office Scripts, improving efficiency across business units.

EXPERIENCE

Tech Lead | Xceedance India Pvt Ltd　　　　　　　　　　　　　　　　　　　　　　**July 2018 - Present**

- Led and mentored a team of **4-5 developers** while also contributing individually to **SharePoint**, **Power Platform,** and **full-stack applications**, ensuring timely and high-quality delivery.
- Developed and customized **SharePoint solutions** using **SPFx(React)**, **CSOM**, **JSOM**, and **Microsoft Graph** integrations, streamlining enterprise workflows.
- Architected enterprise applications using **ASP.NET Core Web API**, **ReactJS**, **Redux Toolkit**, and **Azure services**, aligning with scalability, security, and business requirements.
- Implemented **Power Platform Center of Excellence (CoE)**, standardizing best practices, governance, and reusable frameworks across the organization.
- **Worked closely with enterprise architects to influence architectural decisions**, created **architecture diagrams** and **technical documentation**, and presented solutions to the **Architecture Review Board** for approvals on key implementations.
- Built **AI-driven** applications using Semantic Kernel, enhancing automation and enabling decision-support systems.
- Designed and developed scalable **APIs** with **ASP.NET Core** and **SQL Server**, integrating with **ReactJS** frontends for seamless user experiences.
- Delivered impactful **Power BI reports** and **dashboards**, improving data visibility and achieving **95%+** user satisfaction across business units.
- **Enhanced team performance** through code reviews, enforcing coding standards, and mentoring junior developers, resulting in improved productivity and code quality.
- Took ownership of end-to-end project delivery as both an **individual contributor** and a **team leader**.

AWARDS AND CERTIFICATIONS

- Azure AI Fundamentals
- Azure Fundamentals
- Power Platform Solution Architect Expert
- Power BI Data Analyst Associate
- Power Platform Developer Associate

- Winner of Hackathon at Xceedance

EDUCATION

BTech from **Galgotias University** with **8.19 CGPA**. (May, 2018)
12th from **Kendriya Vidyalaya** with **83.8 %**. (May, 2014)
10th from **Kendriya Vidyalaya** with **9.8 CGPA**. (May, 2012)

PROJECTS

AI-Enabled Chatbot Agent - Developed a full-stack AI assistant using Semantic Kernel Agent Framework and LLMs. Enabled contextual responses, planning, and memory, plugins with secure OAuth authentication. Containerized the solution with Docker and integrated persistent memory using Qdrant.
Tech Stack: React, Redux Toolkit, Tailwind, Node JS, ASP.NET Core, Semantic Kernel, Qdrant, SQL Server, Docker, Azure Blob Storage
GitHub Repo:- https://github.com/Munendra7/Ai-Agent

Quarterly File Review System - Designed and implemented a scalable application to streamline policy audits. Built dynamic SPFx-based checklist forms with integrated business rules, automated account assignment using Azure Functions, and improved data accuracy by cleansing SQL datasets.
Tech Stack: SharePoint, SPFx, Graph API, Azure Functions, Power Automate

Policy Block System - Led a 4-member team to deliver a robust enterprise application. Integrated Power Pages with Dataverse, Power BI, and SharePoint for data and document management. Implemented Azure AD/B2C authentication and developed custom C# migration scripts for SQL to Dataverse to migrate legacy application data.
Tech Stack: Power Pages, Dataverse, PCF, Power Automate, Power BI, SharePoint, C#

MSL Application – Orchestrated architecture and delivery of a Power Platform solution. Used Power Automate Desktop for web scraping, Dataflows for ETL, and Office Scripts for Excel automation, cutting manual effort by **50%** and improving reporting accuracy.
Tech Stack: Power Apps, Power Automate (Cloud/Desktop), Dataflows, Office Scripts, PCF, SharePoint

Global Underwriting Resource – Built a document management solution in SharePoint with SPFx. Implemented metadata-driven search, automated migrations with C#, and designed a streamlined document workflow from draft to final library.
Tech Stack: SPFx, SharePoint, CSOM, JSOM, Power Automate, C#

Document Management API - Designed and developed an ASP.NET Web API as a wrapper over SharePoint and Graph APIs, enabling enterprise applications to seamlessly use SharePoint as a Document Management System (DMS). Implemented dynamic document generation from DOCX templates, automated PDF conversion, and streamlined onboarding of hundreds of templates with minimal configuration.
Tech Stack: ASP.NET Web API, SharePoint, React, SPFx Graph API, Power Automate

Letter of Authority - Designed and implemented a complex SharePoint-based application to manage hierarchical delegation of authority across the organization. Built workflows where senior users could assign, renew, or copy authority to team members, with each assignment passing through a multi-level approval process. Integrated SPFx, REST APIs, and Power Automate to deliver a fully managed workflow for authority lifecycle management.
Tech Stack: SPFx, JavaScript, jQuery, REST API, CSOM, JSOM, C#, Power Automate

Building Valuation Benchmark Tool - Delivered a Power BI reporting solution to track and benchmark property valuations. Designed interactive dashboards with maps, pivot-tables, charts visuals, bookmarks, and slicers, powered by Azure SQL and Azure Data Factory pipelines. Implemented advanced DAX calculations and measures, and integrated live foreign exchange rates via Azure API Management to dynamically adjust valuation logic in real time.
Tech Stack: Power BI, Azure Data Factory, Azure SQL, Azure API Management
